SNACK ⇄ SWAP

SNACKSWAP

Product Documentation, TLDR; Vision & Build by rochana dudwadkar

Purpose

Helping users make healthier snack decisions in under 10 seconds.

Problem Statement

Snack is one of the irresistible meals of our day. Processed food types- chips, muffins, and carbonated drinks, are highly dangerous for our bodies. But finding alternatives for them can be a long process that surges our hunger. That makes us fall into the trap of eating instantly available snacks.
Image 1 (on page 2) shows the difference in hunger satisfaction, energy levels and mood of a person after eating a healthy snack option and usual snack option.

Target Audience

Primary persona: People who

- snack impulsively
- search alternative snacks on internet
- want to be healthier

Secondary persona:

- Fitness enthusiasts
- Habit builders

Market Research

Table 1 shows two categories of apps found in the market that track calories, provide nutrition value, ingredients list, and recipes (or alternatives) for healthy snacks.

App/Website Name	My Fitness Pal	YouTube/Instagram
Category	Track calories	Healthy Swaps
Pro	Detailed tracking and nutritive value	Detailed recipes
Con	Heavy cognitive load for beginners	Time consuming, Not instant

Table 1 : Market Research - My Fitness Pal and YouTube/Instagram

Insight: These apps do not offer lightweight decision nudges, or a quick glance at favourite snacks vs alternatives.

Solution

Provide one stop shop solution to users: Search for a favorite snack and get its Swap! Learn about their ingredients and nutrition value differences.

Use SnackSwap tool *Image 2* provides a snapshot of the app below

Metrics

% of sessions where user selects a swap
